Polycom® Wireless Microphone Quick Start Guide

For use with Polycom SoundStation VTX 1000®, Polycom SoundStation2™ EX and Polycom SoundStation IP 6000

Quick Start Guide

Pairing the Microphone and Receiver

Your microphones and receivers are automatically “paired” at the factory. However, if the Microphone Pair/Power LED ™ and the Receiver Status LED glow a solid green, the microphone is ready to use.

To pair the microphone and receiver:

1. Press and hold the Pair/Page button on the bottom of the receiver for at least five seconds, until the Receiver Status LED fast-flashes green (“pairing” mode). The LED will fast-flash green for 30 seconds.

2. While the Receiver Status LED fast-flashes green, press and hold the Mute/Pair button on the microphone for at least five seconds, until the Microphone Pair/Power LED ™ and the Receiver Status LED fast-flash green. If the microphone is paired, the LED will turn green (“pairing” mode). The microphone is ready to use.

Pairing the Microphone and Receiver

You can page a microphone to identify the microphone that is paired with a particular receiver, or to locate a microphone.

To page a microphone:

1. Press and release the Pair/Page button on the bottom of the receiver.

2. The paired microphone will beep, and the Pair/Page button will light green.

3. Press and release the Pair/Page button on the microphone you wish to page.

You can use the microphone as soon as you have established a radio link with the receiver. Please consult the dealer or an experienced radio/TV technician for help.

Note: This equipment is tested and complies with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.

This PWM-10T is marked with the CE mark. This mark indicates compliance with the Electromagnetic Compatibility Directive 2004/108/EC and the Low Voltage Directive 2006/95/EC. Operation is subject to the following conditions:

• This apparatus must not cause harmful interference, and must accept any interference, including interference that may cause unacceptable operation of the apparatus.
• The equipment is intended to be used indoors only. It is not suitable for use outdoors and may not be exposed to rain or moisture.

Note: This equipment is intended for indoor use only. It is not suitable for use outdoors and may not be exposed to rain or moisture. This equipment uses a frequency band not available in all countries. Operation is subject to the following conditions:

1. Operation is subject to the following conditions:

2. The equipment must be installed and used in accordance with the instructions.

3. The equipment must be used indoors only. It is not suitable for use outdoors and may not be exposed to rain or moisture.
Parts List

Polycom Wireless Microphones connect to your Polycom SoundStation VTX 1000, Polycom SoundStation2 EX, or Polycom SoundStation IP 6000 conference phone, providing a high quality extended audio pick-up range up to 30 feet from the conference phone.

The following items are included in your Polycom Wireless Microphone package. If you are missing any items, contact your Polycom Wireless Microphone reseller.

- Wireless Microphone (2)
- Power Adapter (2)
- Charging Cradle
- Receiver (2)
- Adhesive Tape (2)
- Country-Specific Power Cable

Features

- Mute/Unmute LED
- Power On/Off Switch
- Battery Door
- Status LED
- Pair/Page Button
- Power Connector Jack
- Charging Cradle Connector

Connecting the Receivers to the Conference Phone

1. Attach the adhesive tape to the receivers.
2. Place the receivers on the conference phone.
3. Connect the receiver cables to the microphone extension ports on the conference phone.
4. For best results, place the SoundStation conference phone in the center of the table and place the wireless microphones at each end of the table.

Charging the Wireless Microphones

Note: Polycom recommends that you fully charge the microphones before you use them for the first time. You can charge the microphones while they are turned on or off.

You can charge the microphones using the charging cradle or the power adapters. When you use the charging cradle, you can charge one or both microphones. When charging completes, the Pair/Power LED \( \checkmark \) \( \square \) glows green.

To charge the microphones using the charging cradle:
1. Attach a power adapter to the charging cradle, and then plug the power adapter into an electrical outlet.
2. Place the microphones in the charging cradle. Charging begins.

To charge the microphones using the power adapters:
- Attach a power adapter to a microphone, and then plug the power adapter into an electrical outlet. Repeat the process with the other microphone, if needed. Charging begins.
